

Discount Code Information

From time to time we may offer promotions or discounts. This is how to use a promotion code on the web site. Simply shop for at least one item and click on view your cart. At the top is a box to enter in a code. After you enter the code the promotional prices will automatically appear on all items discounted by the promotion. Enter the code exactly watching for upper case, lower case and spaces or no spaces. Make sure to get on the email list as this is one method we contact people on promotions.

Class information

Just to let people know we do teach classes. Our instructors are very experienced and have actually taught a number of people that are now teaching themselves. We offer a wide variety of classes. There are basically 2 options for taking a class. We have structured classes that are usually held on Saturdays and are usually from 1 to 3 PM. The entire class works on the same project. A list of projects will be posted soon. The cost is \$20.00 plus materials. The other option is a private class. This option is for a one on one class with the instructor. The cost is \$20.00 for a 1 hour class but you can move at your own pace. If you book a private class the time and day of the week are flexible to fit your schedule and the instructors. All classes are to be prepaid to reserve your non refundable spot.
